

There are hundreds seniors who are so fluent with their ASL language within their inherent cultural education with no english fluency. It is so CRITICALLY IMPORTANT that they do receive their equilavent access to their visual cultural communications. Imagine how their access with the visual videophone will be A MAGNIFICIENT utilization to receive the maximum functions to their needs instead of being caged up for decades. This is a very critical need not to be ignored for those seniors who have been deprived their essential access for decades. Please give them the opportunities to receive this breakthrough fullfillment.
